Training towards social entrepreneurship and deinstitutionalization for individuals at risk of social exclusion

The project supports the social and labour inclusion of people at risk of exclusion through training in social entrepreneurship and deinstitutionalisation. With partners from Italy, Spain, and Bulgaria, it promotes skills development, autonomy, and sustainable employment while strengthening educators' roles and building a European network for sharing inclusive practices.

The Expert Seminars in Trieste bring together participants for a two-day exchange, showcasing practical approaches and local methodologies. Through collaboration with social cooperatives, participants explore real initiatives, share strategies, and co-create guidelines to foster inclusive enterprises, enhance adult education, and improve job opportunities for marginalized groups.

Claudia Battiston (Department of Mental Health, ASUGI)
